SKILLS

Python
Django FrameWork
GraphQL
Database Design
Git & GitHub
Html & Css

ABOUT ME

An intermediate Python-Django developer with approximately one year of experience, possessing a strong Python programming base and advanced understanding of the Django framework, is seeking opportunities for self-improvement and to take on fresh challenges.

PROJECTS

CINEMA TICKET PURE PYTHON CLONE

| A terminal UI app that works similar to Cinema Ticket coded only with python

- Providing a practical UX inspired by real-world scenarios
- Includes a compact version of Django's ORM integrated
- Offers an enjoyable user experience

A MEETING PLANNER FOR COMPANIES

| An event planner coded with basic Django concepts and intermediate Front-End design

- Implementing a personalized admin interface
- Setting up an OTP login/reset password system within the terminal
- Incorporating calendars and managing time zones

A UNIVERSITY SYSTEM

| University system APIs facilitate seamless integration among academic applications and services.

- Uses GraphQL for dynamic data exchange
- Integrates a real-time updating caching system
- Swift and dependable coding
