Behdad Sayadi

BACK-END DEVELOPER

About me

Intermediate Python-Django back-end developer with over a year of experience. Skilled in creating scalable web applications, designing APIs, and enhancing back-end systems. Enthusiastic about utilizing modern technologies such as Docker, GraphQL, and Prometheus to deliver efficient solutions. Looking for opportunities to join dynamic teams and further develop my back-end expertise.

Experience

Freelance Django Developer

Developeria team 2023 - Present

One of the key members of Developeria's back-end team specializes in coding the server-side components of projects and managing their deployment.

Projects

University System (Python, Django, GraphQL, Docker)

Quera Task-Oriented Django Bootcamp

- Designed and implemented GraphQL APIs for dynamic data exchange.
- Developed real-time caching systems to optimize performance.
- Dockerized for easy deployment and scalability.

Cinema Ticket System Clone (Python)

Quera Task-Oriented Django Bootcamp

- Developed a simplified version of Django ORM.
- Focused on user experience through a terminal UI.

WhatsApp Mass Messaging Platform (Python, Django, Selenium, Prometheus, Docker)

Developeria Team Project

- Utilized Selenium hub for on-demand workers.
- Integrated Prometheus for real-time resource monitoring and Docker for deployment.
